MIDIVERSE MODULAR MVM018: DUAL VCA

DUAL VCA

This potentiometer controls the voltage level of the VCA, or is a voltage offset when used with the CV inputs

8HP
Module depth: 40mm
Draws 22mA from the +12V rail and 22mA from the -12V rail

LEVEL

CV1

This potentiometer attenuates the signal present at the CV1 input

Voltage level LED indicator

IN   CV1   CV2   OUT

Signal input

Signal output

Control voltage input 2

Control voltage input 1

LEVEL

CV

This potentiometer attenuates the signal present at the CV input

IN   CV   CV   OUT

Inverted control voltage input
